WEB DEVELOPMENT EXPERIENCE

Web Development Immersive // November 2015 - March 2016
General Assembly, New York, NY

- Created a front end memory game built using JavaScript and jQuery to manipulate HTML and CSS
 - JavaScript implemented for game logic, tracking card actions, triggering matches and keeping score
 - jQuery utilized for animations, making cards disappear when matched or revert to original state if no match was found
- Developed a database driven message board CRUD web app built on Sinatra with Ruby and SQL
 - Created secure sign up, login and encrypted password functionality with the database by utilizing bcrypt Ruby gem
 - Implemented Skeleton boilerplate for CSS, deployed the Rack based site to Heroku cloud hosting platform
- Built single page baseball statistics comparison site with a Ruby on Rails framework
 - Incorporated AJAX calls to PostgreSQL database to dynamically update page content
 - Employed Chart.js, JavaScript library, to highlight data visualization with dynamic response and Bootstrap for styling
